# CATALOG

## GOLDBLATT TOOL CO.

KANSAS CITY 8, MO.

# OUR 63<sup>rd</sup> YEAR

—OF—

## *Holding Prices Down Keeping Quality Up*

# **JANUARY 1948**

**AMERICA — and the world needs housing!**  
**You need reliable tools to do this important job!**  
**And you need them now!**

This means that any manufacturing concern which measures its success in terms of satisfied customers, rather than merely in dollars and cents, must exert a tremendous effort to maintain the quality of its products while constantly increasing them in quantity to meet today's pent-up demand.

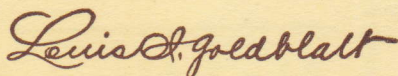

Makeshift, substitute tools do not interest you—or us, and we have made them only when a situation of desperate scarcity has existed.

Whenever the urgency of our customers' needs has forced us to manufacture substitute tools, we always try to duplicate standard models as nearly as possible with the available human skill, raw materials and equipment.

Sixty-three years of service to the Trowel Trades has taught us that the best proof of our products is the regularity with which our customers order from us. To the thousands of loyal Goldblatt customers, we say, thank you once again, and to those who have not yet worked with our tools, we extend a cordial invitation to join the Trowel Brand Fraternity which proudly uses proudly made, Masons' Tools by GOLDBLATT.

Accept the sincere good wishes of every member in our organization for a happy, prosperous, and peaceful '48.

**Sincerely,**

A handwritten signature in dark ink, reading "Louis S. Goldblatt". The script is cursive and elegant, with the first letters of the first and last names being capitalized and prominent.

**President**

**GOLDBLATT TOOL COMPANY**

**1522 Walnut Street**

**Kansas City 8, Mo.**

# Our Terms

1. Please include a check or Money Order with your order.
2. Please do not ask us to make C.O.D. shipments; they involve red tape all along the line and delay your order.
3. When telegraphing orders, please wire money with the telegram.
4. When you request delivery of your tools by parcel post or express with transportation charges prepaid, please add 5c for each dollar of your order.
5. On orders of less than \$5.00, we must require a minimum postage and packing charge of 25c.
6. When postage is not included with your order, we send it via express, express charges collect.
7. Such heavier or bulky items as Long Handle Pavers Trowels, Steel Mortar Boxes and Mortar Hods and Leveling Instruments are shipped by express or freight, transportation charges collect.
8. Shipments on open account will be made only to Government and State offices and to other buyers whose credit has already been established with our Credit Department.

ALL PRICES ARE NET F.O.B. OUR FACTORY

(Except Tool Kits—See Pages 53 to 58 inclusive, on which pages, the prices as quoted, are F.O.B. destination.)

# GOLDBLATT Cementers Trowel

The Only Complete Line of Cementers Trowels in Which All Sizes Are Made With ALUMINUM MOUNTINGS.

## Aluminum Mounting

## MOST POPULAR CEMENT FINISHERS' TROWEL

Notice the extra large stiff rib to withstand heavy pressure. Blades correctly tempered of the toughest spring steel have the undisputed reputation of being the thinnest ground. Expert cement finishers appreciate these wonderful features, all of which has taken years of time and study to accomplish. ONCE USED, YOU WILL USE NO OTHER. IT'S A DREAM. Furnished in 4 inch, 4½ inch or 5 inch widths.

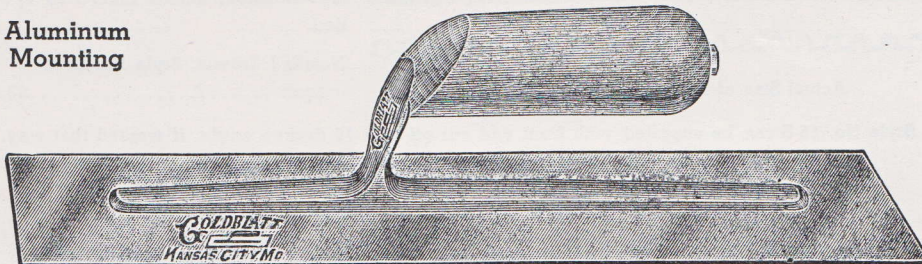

When Width Is Not Specified, We Ship the Standard Width, Which Is 4-Inch

## Please Give Catalog Number, Length and Width

No. 4-S—Length, 10 inches, Ten Rivets .....	Price each, \$3.35
No. 4-S—Length, 11 inches, Ten Rivets .....	Price each, 3.35
No. 4-S—Length, 12 inches, Ten Rivets .....	Price each, 3.35
No. 4-S—Length, 14 inches, Twelve Rivets .....	Price each, 3.60
No. 4-S—Length, 16 inches, Fourteen Rivets .....	Price each, 3.85
No. 4-S—Length, 18 inches, Sixteen Rivets .....	Price each, 4.10

## CEMENT FINISHERS' FANNING TROWEL

## Aluminum Mounting

Our Fanning Trowels are of same superior quality and workmanship as found in our regular Cement Finishers Trowels Described above. The only difference is that they come in narrower widths. They can be had in 2½ inch, 3 inch or 3½ inch widths and in any of the lengths listed under the Cementers Trowels above. Prices the same. Simply give catalog number, length and width of Fanning Trowels wanted. We Send 3-inch Width Unless Otherwise Specified.

All Above Trowels Can Be Had With CHROME-PLATED Blades. Our CHROME-PLATED Trowels are being used on Hubbellite floors and pavements or similar applications. When CHROME-PLATED Trowels are wanted, state so in your order, and add \$1.00 extra per trowel to the prices of the regular trowels.

## GOLDBLATT NOTCHED OR SERRATED TROWELS

Used in spreading Mastic Pastes or Glue in preparation for the laying of Rubber, Asphalt, Cork, Linoleum and Composition Floors and Walls.

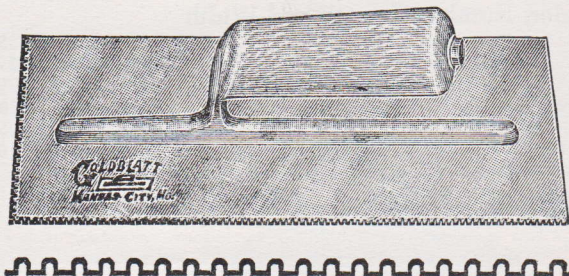

Actual Size of Notches in Trowel No. 5-S

The Trowel shown to the left is the more popular type in spreading pastes on floor work. Size of blade is  $10\frac{1}{2}'' \times 4\frac{1}{2}''$  and is mounted to an aluminum shank. The picture shows the left long side notched, although most mechanics prefer the right long side notched. We ship the latter, unless otherwise specified.

Notched Trowel, Style No. 5-S.

Each .....\$3.50

Actual Size of Notches in Trowel No. 55-S

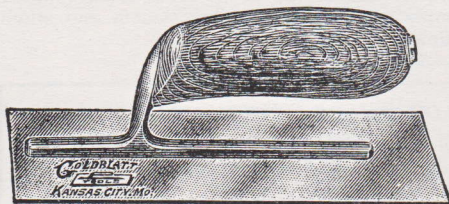

This type is more popular in spreading pastes for wall work. Size of blade is  $10\frac{1}{2}'' \times 4\frac{1}{2}''$  and is also mounted to an aluminum shank. This picture, too, shows left long side notched, whereas we ship these trowels with right long side notched, unless otherwise specified.

Notched Trowel, Style No. 55-S.

Each .....\$3.50

Style No. 55-S can be supplied with front end cut off at a 10 degree angle. If wanted that way, specify Notched Trowel No. 5510-S.

## MIDGET SIZE CEMENTERS TROWEL

### A MOST USEFUL TROWEL

When finishing small areas, Window Sills and similar spaces

Size  $7\frac{1}{2}$  inches x  $3\frac{1}{4}$  inches

## IMPORTANT NOTICE

Due to the acute shortage of skilled forge smiths, some manufacturers have discontinued making Pointing Trowels and other trowels as illustrated on this page. However, Goldblatt Engineers, faced with the same shortage have developed a strong hollow post one-piece trowel, properly tempered, which although not of conventional design, is an excellent forged trowel and readily acceptable by the trowel trades. As soon as possible, we will again offer you the finest in solid post Pointing Trowels.

**BUY BRUSHES NOW****Good Selections Can Be Made at Reasonable Prices**

There are few if any cargoes of Bristle coming from abroad. For this and other reasons Pure Bristle is quite scarce. Nylon Bristle Plasterers' Brushes are now in great demand. Judging from present foreign conditions, we recommend that our customers buy brushes now, while good selections can be had.

Plasterers Brushes Fully Guaranteed to be as represented at time of purchase to be free from defects in workmanship and materials, but cannot guarantee after being used.

Results Obtained Depend on Care Given. Many materials used by plasterers contain alkalies (or acids) which even in very small quantities are very harmful to bristle. The harm done during use is, naturally, unavoidable, but the "after use" harm can definitely be reduced, if not entirely eliminated. The real damage to the hogs' bristles comes by allowing the wet alkali (or acid) to remain in the damp bristles after the brush has been partially washed out and hung up to dry. Only complete removal of all the injurious material will prevent the bristles from being burned and ruined for further use. This CAN be done by washing your brush thoroughly in running water right down to the ferrule edge and along the plugs in the center of the brush.

**NINE POINTS TO FOLLOW**

Try practicing the following rules and see if your brush dollar doesn't stretch much farther:

1. Never let a brush stand in water.
2. Wash your brush (IMMEDIATELY AFTER USING) in running cold water, outside and middle; then in a neutral soap solution, finishing with clear luke-warm water to completely rinse clean.
3. Whip out excess water (without striking brush against anything that would damage ferrule or setting) and comb gently, but thoroughly, with an ordinary comb to straighten all bristles.
4. Hang the brush up to dry, bristles pointing downward. For best results, have two brushes and alternate their use. This allows for thorough drying. A continuously wet brush swells at the ferrule and the bristles rot and become floppy.
5. Never try to do a finishing job with a brush you have used most of the day for washing down. To work properly, the bristles of a brush should be dry when you start.
6. If the brush is to be put away for a short time, allow it to hang until completely dry. Then comb again, dipping comb in water to moisten and straighten outer bristles. Wrap the brush immediately in heavy paper. The paper should be shaped exactly like the original wrapper—that is, wedge shape. Be sure all the bristles lie in their proper place.
7. Hang the wrapped brush up, or lay it on a flat surface.
8. If the brush is not to be used for some time, place some naphtha flakes or a piece of tar paper in the wrapper—moths will destroy bristles.
9. Keep the brush away from hot temperatures.

Number Four is Important. Disregard for point four (4) is the cause for many brush troubles. What constitutes "dry" to the user and the meaning of "dry" to the brush manufacturer is probably the nucleus of the problem of brushes swelling at the heel.

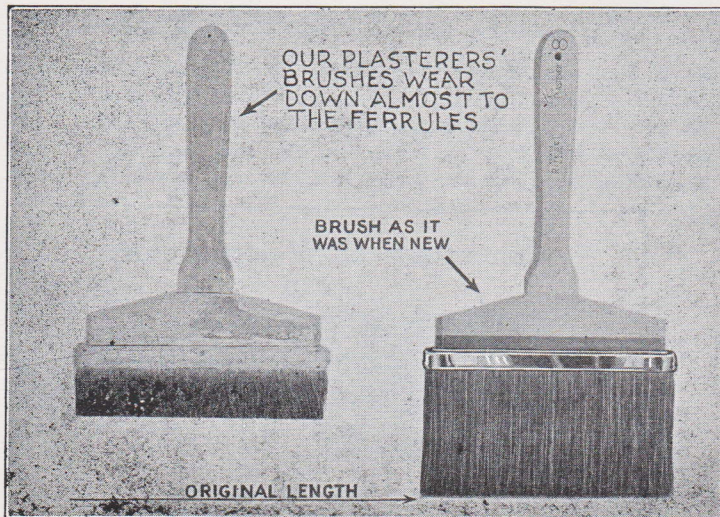

And No Fooling. "Dry" means absolutely dry. The brush must be given time to allow every bit of moisture to leave the bristles, heel and plug. This is why so many old-time plasterers used two brushes and alternated their use. A plasterer's brush used today should be allowed to dry tonight, all day tomorrow and tomorrow night. The following day it is ready to be used again, if drying conditions are satisfactory—not before.

Manufacturers still preach this procedure for obtaining best results from brushes. However, it appears

as though some of the younger plasterers feel that this is just a "song and dance" act to sell an extra brush or two.

**Moisture Accumulates.** Using a brush for two or three hours today and letting it dry until tomorrow is not enough. This is especially true if the procedure is repeated often. The moisture accumulates and after many days of this "half drying" operation, the brush swells and the bristles tend to rot and become floppy.

Good Brushes can be made to do extra duty. So, buy good brushes and take proper care of them — it is the only sound way to reduce brush costs.

# LEVELING INSTRUMENTS

No. 2 FARM LEVEL

No. 4 CONTRACTOR'S LEVEL

No. 5 CONVERTIBLE LEVEL  
Illustrated With Compass

Used and endorsed by engineers, contractors, builders, schools, extension service and individual landowners everywhere, for terracing, ditching, grading, irrigating, tile draining, leveling foundations, getting angles, running lines and surveying. BOSTROM Levels are simple, accurate, durable and complete, and are sold on the guarantee of satisfaction or money back.

## No. 2 FARM LEVEL

The telescope is 10 to 12 power with sliding eye piece adjustment and fixed cross hairs. The level vial is ground 8 to 9 minutes. The telescope and level vial are mounted in a revolving turret which is simply turned over on the leveling plate to check the adjustment of the line of sight, 3 point bearing on the leveling plate, movable graduated circle with lock screw, 3 leveling screws, center screw and spring, and 5 foot tripod are some of the features. 9 foot rod, target, plumb bob, carrying case and directions are included.

Shipping Wt., 17 Lbs.

Price, complete ..... \$32.50

## No. 4 CONTRACTOR'S LEVEL

The telescope is 12 to 14 power with minimum focus of 4 feet, fixed cross hairs, stationary eye piece, optical axis adjustment, rack and pinion to objective slide; ground level vial 7 to 8 minutes. Telescope and level vial are mounted in a revolving turret which is simply turned over on the leveling plate to check the adjustment of the line of sight. 4 inch movable graduated circle, 5 minute vernier, clamp and slow motion screw, 3 point bearing, steel center post, shifting center, 4 leveling screws, trivet and 5 foot tripod are some of the features. 9 foot rod, target, plumb bob, carrying case and directions are included.

Shipping Wt., 18 Lbs.

Price, complete ..... \$49.50

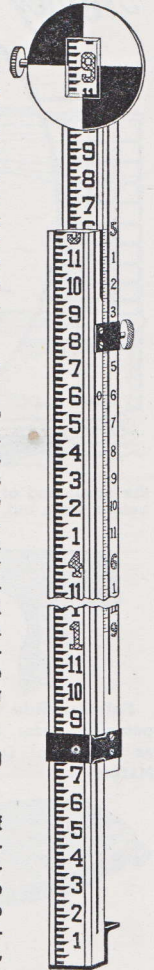

## No. 5 CONVERTIBLE LEVEL

The telescope has lenses with magnifying power of 12 to 14 diameters with minimum focus of 4 feet, stationary eye piece, fixed cross hairs, optical axis adjustment, rack and pinion to the objective slide; the level vial is ground 7 to 8 minutes. For level work the telescope rests in 2 wyes. 4 inch graduated circle divided to single degrees, adjustable 5 minute vernier, clamp and tangent, vertical arc and index, steel center, 3 point bearing on the horizontal limb, shifting center, 4 leveling screws, trivet and 5 foot tripod are some of the features. 9 foot rod, target, plumb bob, carrying case and directions are included.

## PLASTERERS' TILE MARKER DELUXE — PATENTED

*Be an Expert TILE MARKER!*

*Earn  
Big  
Money*

*The Little Tool  
that Makes  
It Easy!*

You have dreamed of a Tool with which you could do an extra fine job of marking imitation tile in Bathrooms and Kitchens without that fear of cutting ugly uneven grooves and utterly ruining the looks of the job. You have often thought that if you could just get your hands on a Tool like this that you would welcome every job of this kind.

Our patented DeLuxe Tile Marker, which is shown here, overcomes all obstacles formerly encountered in this work. It is so devised that even an apprentice can use the tool and accomplish a perfect job of Tile Marking. It is impossible to cut wrong, too deep or too shallow. Simply pencil mark the lines, this can be done with the aid of a compass and a straight edge. Squares can be laid out in the following most popular sizes—4 x 4 inch, 6 x 3 inch, or 6 x 6 inch. This little wonderful tool with its keen Razor Steel Blade will do the rest.

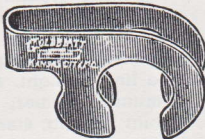

Made of Aluminum. Weighs only 3½ ounces, 6½ inches long. Can be carried in Vest Pocket.

In the picture at the left you will see just how our Patented DeLuxe Tile Marker is applied to actual work of cutting the small joints on hard surface plastered walls. Notice the convenient shape of the tool. Notice that it is just as easy to cut into the corners and angles as it is to cut along the middle of wall. Notice how the plaster comes through that keen sharp blade in a steady, uniform stream, like a liquid comes through

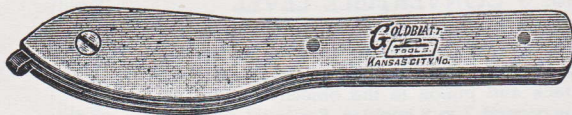

the small end of a funnel. Never out of order, you can always depend on it. Blades will last a long time before worn out. New blades can be inserted in one minute.

Full size Side View of our patented Razor Steel Blade as used in DeLuxe Tile Marker.

It's worth a \$10.00 bill, but produced so that every Plasterer can afford it at only.....\$1.25  
Extra blades 15c each or 2 for a quarter.  
Just specify DeLuxe Tile Marker

With each DeLuxe Tile Marker we include two blades, one to cut half round joint and one to cut "V" joint. See illustrations above.

## LEVEL PLATE—2½"x3½"

An instrument that is quickly detachable and adjustable to any straight edge, especially adaptable for long distances or in windy weather. It is not a complicated device, being very simple in its construction, and is always reliable. It is made of high grade materials and fitted with accurate level vial well marked.

It is in great demand by carpenters, masons, tile layers and everyone having use for an extra long level.

No. 28—Nickel plated. Weight ½ lb.

# GOLDBLATT EXPERT CAULKING TROWELS

for Tuck Pointers

• FINEST CUTLERY QUALITY

These Caulking Trowels were developed to fill the demand of Expert Tuck Pointers. Made of finest quality Tool Steel, carefully forged, properly ground and tempered.

The Blade and the Post are fully polished with identical workmanship as found in the best grades of cutlery.

The Blades of 5½" length are also taper ground for correct flexibility. The heel end of blade is finished off square, which is a feature very much desired by the expert Tuck Pointer.

The handles are of the finest quality hard wood, of full size with long steel ferrule and the lift is of the correct height for proper balance.

We are proud to offer these Expert Caulking Trowels in sets, including one of each of the following sizes, ¼", ⅜", ½", ⅝", ¾" and 1" for only \$8.50 per set of six trowels.

The above trowels can also be supplied separately, not in sets, in any of the sizes desired at \$1.50 each.

## BRICKLAYERS SPACING RULE

### How Many Bricks? How Much Mortar?

#### THE BRICK MASONS' RULE TELLS YOU

Ten Brick Mason's Scales on one side of this "Zig-Zag" Rule provide a quick, accurate method for spacing brick courses. No need for course sticks. Saves time laying out a story pole. The other side of the rule is graduated in 16th of inches on both edges and has vertical figures.

#### HOW TO USE THE BRICK MASON'S RULE No. 167

1. To determine which one of the ten scales to use when plans call for a mortar joint of specified thickness, add average thickness of a brick and the mortar joint specified, place thumb nail on edge of rule opposite this total in inches and turn rule over to find which gauge mark on Mason's Scale is opposite. This will be correct scale to use. Note: A common method of determining this spacing, to average the thickness of the bricks, is to measure the height of four bricks in inches and add four times the specified mortar thickness. Then place thumb nail on edge of rule opposite this total in inches and turn over to find which gauge mark on the Mason's Scale is opposite. For example, four courses in 11 inches will be opposite scale mark 6.

2. To determine what scale to use for even courses in a given space, measure opening with brick mason's scale, laying brick to scale mark which is closest to space given. Note: It is well to check scale spacings before selecting one of the several that may be used in order to use a scale that will give a mortar thickness nearest to the one specified. Illustration: Suppose opening which shows either Scale 4 or Scale 6 as giving even courses. Scale 4 spacing is  $2\frac{3}{8}$ ", Scale 6 spacing is  $2\frac{3}{4}$ ". With brick averaging  $2\frac{1}{2}$ " Scale 4 would give  $\frac{1}{8}$ " joint while Scale 6 would give  $\frac{1}{4}$ " joint.

No. 167—6 feet long. Each.....\$1.25

#### BRICKLAYERS' LINE PINS

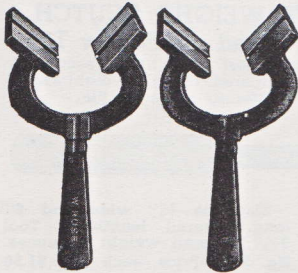

Stiff and long enough to hold the lines required by modern building operations,  $\frac{5}{8}$ " x  $\frac{1}{8}$ " x 7". Tool Steel—tempered and ground.

No. 33P—Per pair.....40c

## BRICKLAYERS' CORNER BLOCKS

#### TO HOLD THE LINE

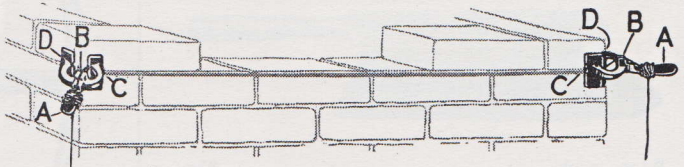

Around the stem at "A" the line is wrapped. It is carried through the slot at "B" at the forks and then between the wall and the flat face through

the slot at "C". The pull of the line draws the other face, "D" against the brick at right angle to the line.

Of course, the mate of this corner block is hooked in the same manner against the corner at the other end of the line and keeps it taut.

No. 33—Corner Blocks. Per Pair. .75c

## MASONS AND BUILDERS GUIDE

For Bricklayers, Stone Masons, Cement Workers, Plasterers and Tile Setters

If you now want to know the advancements in building progress—save mistakes—save work—save material—solve your problems—increase your efficiency—it will pay you to examine Audel's Masons Guide—four numbers.

These Guides are bound in attractive, flexible covers with gold edges, making them a pleasure to use; paper is a beautiful clear white stock, with clear pleasing type, easy to read. Titles stamped in gold. The volumes present a professional appearance. The 2,067 illustrations are graphic, quickly and easily understood and the information is quickly applied. Practically every page has an illustration, thus making the text interesting, useful and practical.

Complete instructions telling how to distinguish clays; make bricks; fix mortar; use bricklayers' tools; handle materials; lay brick; bond bricks; gauge thickness of walls; brick around openings; lay out arches; place anchors; build foundations; brick up boiler settings; build chimneys; do ornamental work; repair old brickwork; figure brickwork; handle hollow tile; set tile; mix concrete; operate mixers; place concrete; make forms; handle reinforcing, build stucco; build with concrete blocks and tile; waterproof concrete; estimate; read blue prints; lay out foundations; plaster; do stone masonry work, and use structural steel.

1,100 Pages of Inside, Practical, Valuable Information

PRICE, COMPLETE SET OF 4 BOOKS, \$6.00

If you wish to purchase one book at a time, price is \$1.50 per book. See subject given on cover of each book in the picture above—when single books are ordered give volume number.

## TILE-SETTERS WALL TILE NIPPERS

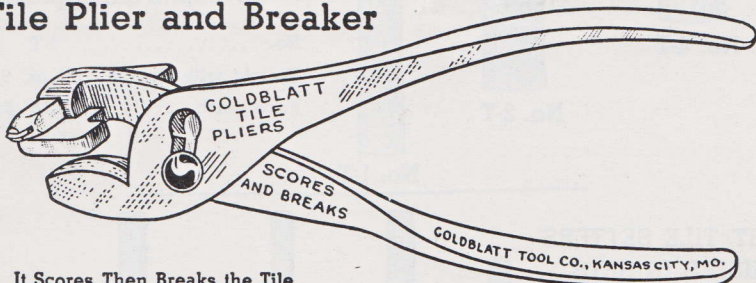

These nippers are designed for the tile-setter and made exclusively to satisfy his requirements. Carefully forged and hardened from fine tool steel. Unusual care has been taken to insure the tile-setter a fine working, well balanced tool of the finest possible quality and efficiency.

### A DISTINCTIVELY DIFFERENT, AND BETTER TOOL

There are many distinctive advantages in the shape of this tool. The offset jaw, its grip, and the specially forged lug or stop between the handles, which does not permit the jaws to bite completely together. This feature prevents dulling of the cutting edges and also prevents pinching of the hand or fingers. Overall length 8 inches.

No. 37N—Price, each.....\$1.90

## Tile-Setters' Combination Wall Tile Plier and Breaker

### It Scores Then Breaks the Tile

Notice the little wheel which first scores the tile. Also notice the especially shaped jaws which then break the tile squarely on the mark scored by the small wheel. Like our wall tile nipper shown above, this fine tool is designed for the expert tile setter who appreciates the value of correctly made tools. Length over all, 7½ inches. Also Suitable for Cutting and Breaking Glass.

Each plier comes with six extra wheels.

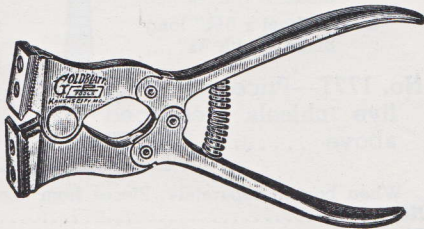

No. 36P—Price, each.....\$3.50

Extra Wheels—Per doz..... 1.00

## DOUBLE POWER CERAMIC TILE CUT-NIPPERS

The opening in the frame is large enough to allow the jaws to be adjusted for wide opening as shown in cut, thus fitting them to be used in cutting tile, for which purpose they are highly recommended by many tile workers who are now using them. The jaws can be easily replaced when necessary

No. 235—7-inch. Price, per pair.....\$6.50  
Extra Jaws, per pair..... 1.35  
Extra Screws for Jaws, each..... .10  
Extra Splines for Jaws, each..... .10  
Extra Springs, new style spring..... .35

Base Tool

### CEMENTERS' WOOD FLOATS

The handle on this Float is designed with just such proportions as to make it the most comfortable. It never cramps the hand and is approved by all expert cement finishers. The sizes below have proven out to be most practical. The way these floats balance in the hand is perfect.

No. 14A—Size $3\frac{1}{2}$ x12.	Price, each.....	.75c
No. 14B—Size $3\frac{1}{2}$ x15.	Price, each.....	.80c
No. 14C—Size $3\frac{1}{2}$ x18.	Price, each.....	.85c

### CEMENTERS' WOOD FLOAT HANDLES

Because of the peculiar way in which the cement finisher holds his float while in use, we designed this handle for their particular use and do not recommend same for any other trade.

This handle is same as used on our expert cement finishers' floats shown above.

No. 14—Price, each.....35c

## CEMENTERS' OR PAVEMENT WORKERS' KNEE PADS

Made of best quality harness leather and lined with a durable soft felt. Shaped almost flat, but are flexible, therefore bend with the knee and made to please you. They will surprise you for quality and workmanship, and the price is only, per pair \$2.75

## ALL RUBBER CUSHION KNEE PADS

A practical, serviceable, comfort-giving knee cushion. Built to mold itself to the contour of the knee. Constructed of solid and sponge rubber with adjustable straps embedded completely within the rubber by our patented process.

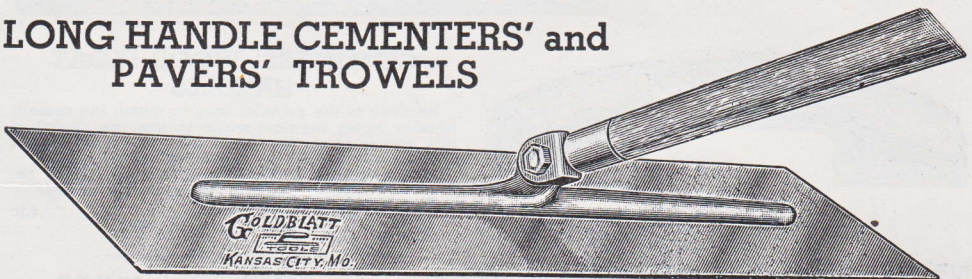

Fits any knee and will not slip down when walking. Solid black rubber surface provides durability and long wear, while the air-sponge rubber interior cushions protect the knee.

Highly practical and necessary for Cement Finishers, Terrazzo Workers and all Floor Workers.

Increases efficiency and lessens fatigue.

Prevents moisture from penetrating the clothes and provides added life to overalls and work clothes.  
No. 20KP—Per pair .....\$2.10

BRICKLAYERS' LEVELS

All Our Levels Have Large Bead in Vials for Easy Reading

NO. E ALUMINUM LEVELS

Not affected by water or atmospheric conditions. Working sides and edges will not become hollow, indented or splintered. Sides, edges, ends and corners always keen, square, straight and smooth. These Levels are made of a tough alloy, not a skeleton casting, yet half the weight of skeleton casted construction. Also much lighter than metal bound wood Levels.

Smooth Machine Surface

Narrowest, thinnest and neatest Levels made, yet the strongest. Meets requirements of most careful and exacting brick layers, plasterers, tile setters and all other trades. Pioneered, invented and manufactured exclusively by Goldblatt Tool Co. 48"x2 1/8"x7/8".

No. E Level—Price, each.....\$8.95

Other Lengths Available Are as Follows:

- 12" x 2 1/8" x 7/8" Price, each .....\$3.50
- 18" x 2 1/8" x 7/8" Price, each ..... 4.50
- 24" x 2 1/8" x 7/8" Price, each ..... 5.00

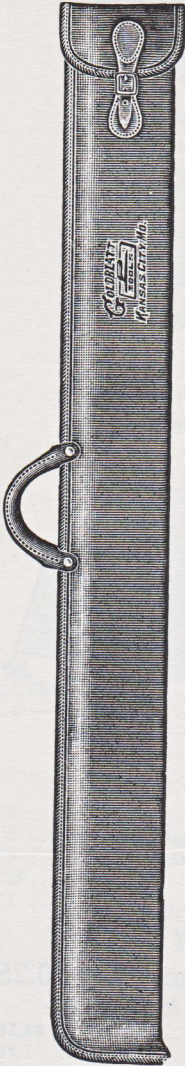

CANVAS LEVEL COVERS

Shown to the left is our Heavy Canvas Level Cover, for hard and long wear. Well worth money if you take a pride in the looks and condition of your Level. Will fit any four-foot Plumb Rule.

No. 5—Price, each.....\$1.25

LEVEL REPAIRS LIMITED

It is absolutely impossible for us to continue general Level repairing. The unprecedented demands on our Level Department have made this step necessary. As soon as we can again obtain sufficient craftsmen, we shall be glad to do all the Level repair work you care to send us. In the meantime, however, we must confine ourselves to repairing Goldblatt Levels only. Before sending in your Levels, please remember that Level repair work takes from 3 to 4 weeks.

# GOLDBLATT TOOL FACTORY—VIEWS

## OFFICE OF OUR MAIL ORDER DEPARTMENT

10 Employees in This Department to Handle Customers' Orders With Promptness and Dispatch

## PLASTERERS' AUTOMATIC WALL MEASUREMENT

Will be found easy, by the use of the Table, which we have reprinted on this page. By request of many of our customers, who have found this table so very convenient.

# Plasterers' Automatic Wall Measurement Tables

Showing Total Number of Square Yards in Rooms of Various Sizes.  
To be used in figuring amount of plaster required for given areas. Directions for Use

**Example:** To obtain the number of square yards in a room 15x16x7 feet, turn to the table giving measurement of rooms with 7-foot ceilings; follow down the column of figures on the left until you come to 15, then follow the figures to the right until the figures exactly under the figure 14, at the top of the column, are reached. 75 square yards, then the half-foot comes in the dimensions of a room, both ways, take the largest number on one side. When it comes on one side only, add one yard and it will be close.

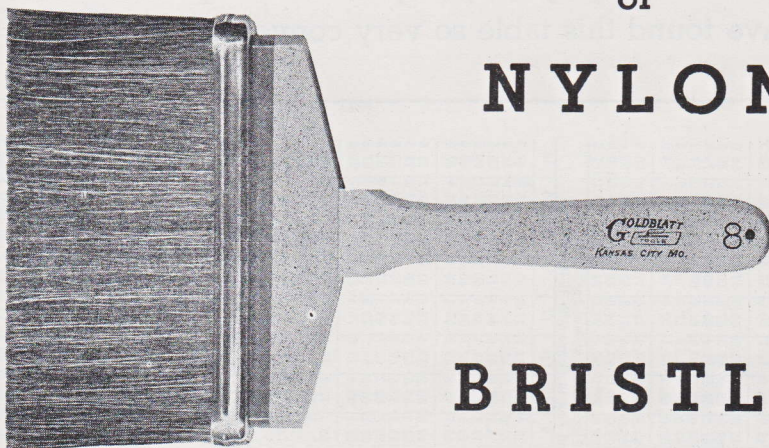

## Number of Square Yards and Feet in Rooms with 7-6-foot Ceilings

# GOLDBLATT MORTAR BOX

NO JOINTS, SEAMS OR RIVETS

A Permanent, Moisture-Proof Box, (Copper Steel)

Smooth Inside Surface — No Seams

Smooth, leakproof, permanent, will not split, rot, or become misshapen because of moisture. Will not break.

A time-saver, a material-saver and therefore a MONEY-SAVER. Leakproof and perfectly smooth interior which makes mixing or cleaning easy. No rivets or seams, as the only joints (at each corner) are electrically welded. Does not warp, shrink, or open up at the seams. In cold weather can be placed over a fire to heat mortar to proper temperature. Ideal in wet weather as waterproof cover for plaster or cement. Formed from a single sheet of rust-resistant Copper Steel, correct thickness. Outside edge of box is steel angle reinforced, making stronger, eliminating sharp edge, and affording convenient grip for handling.

Top

No.	Length	Width	Depth	Gauge	Capacity	Wt.	Price Each
1-MB	5'4"	2'3½"	9½"	16	8 cu. ft.	68 lbs.	\$16.50
2-MB	7'3"	3'8"	11"	14	21.3 cu. ft.	150 lbs.	\$29.50

**NOTE**—Steel as used in above Mortar Boxes, is very scarce. When such steel is available, we make immediate delivery of these Mortar Boxes. If we are not in a position to deliver when your order reaches us, we will return your money. We hope that by the end of 1948, our allocation of rust-resistant copper steel will have improved. We do not buy, nor will we buy any black market steel.

## "DO-ALL" Combination Electric Hammer and Drill

### Two Tools in One

Drilling concrete and masonry for expansion anchors is a drudgery job that comes up in almost every building construction job, as well as in maintenance and installation work and the cost is high. Drilling with the Do-All Electric Hammer averages twelve times as fast as with hand tools. Three inches deep in concrete a minute is an average drilling speed for the Do-All Hammer and it drills all diameters from the smallest to 1½". Do-All star drills are made in 16 diameters and up to 24" drilling depth. Other tools made for the Do-All Hammer are chisels, bull points, diamond points, bush hammers, channelers, tampers and vibrators.

The Do-All Hammer is two tools in one. The hammer mechanism is contained in the malle-

ble iron barrel, which slips on and off the drill member with only two adjustments. The drill has a capacity of ⅜" in metal and ¾" in wood. The change from one tool to the other can be made in one minute. Full instructions are given for assembling and servicing the hammer member, and for lubricating the drill member.

The complete Do-All weighs but 15 pounds. The drill alone 9 pounds. Full ball and needle bearing. Universal motor that runs on either alternating or direct current from a lamp socket. Made for 110- or 220-volt current. Equipped with Jacobs chuck, 3-wire rubber-covered cord with ground connection, and patented rubber tool retainer for holding star drill.

**Model MDH** in the No. 0 Outfit, which includes turning wrench and one star drill of 6" drilling depth ..... \$124.50

**Model MDH** in the No. 1 Outfit, including metal carrying case, turning wrench and 4 star drills of 6" drilling depth ..... 139.50

Specify number of outfit, voltage and diameter of star drills.

## "Combi" 2-Speed Electric Drill

Gives the service of two single-speed drills. Has high speed for drilling small holes and low speed for large holes. No clashing in changing speed because of two sets of gears. Speed is changed by knob on the gear case which operates a simple clutch.

The COMBI Drill is made with three sets of gear combinations. All speeds can be used for drilling. The 2300 speed in Model Z is for grinding. Universal motor. 110 volt or 220 volt. Weight 21 lbs. Length 19¼".

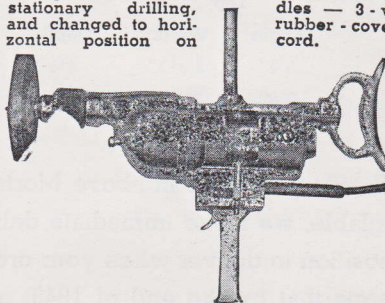

**Model X**, Speeds 425-1500 R.P.M. .... \$114.00  
**Model Y**, Speeds 275- 900 R.P.M. .... 117.50  
**Model Z**, Speeds 425-2300 R.P.M. .... 114.00  
**No. 5 "Quick Change" Drill Stand**, .... 41.50

Drilling range is from ⅛" to ⅝" in metal, and from ⅛" to 1¼" in wood.

Drill can be mounted on No. 5 "Quick Change" Stand for stationary drilling, and changed to horizontal position on

stand for grinding and buffing.

Aluminum Alloy body — full ball bearing — Jacobs Chuck — removable handles — 3-wire rubber-covered cord.

# CERTIFIED TOOL KITS

## For the ARTISAN or APPRENTICE

• WE PROUDLY REPORT that officials of the U. S. Veterans' Administration have called upon us to assemble tool kits for men studying various masonry trades under their supervision.

• THIS IS NATURAL—63 years of catering to the needs of masonry craftsmen have well qualified us to assemble tool kits for men entering one of these trades.

• SKYROCKETING BUILDING ACTIVITY has created a tremendous demand for skilled and semi-skilled Plasterers, Bricklayers, Cement-Finishers, Tile-Setters, Lathers, Tuck Pointers, Insulators, and similar craftsmen.

• SUCH UNLIMITED JOB OPPORTUNITIES will probably direct many returning veterans and other men into one of the masonry trades.

• FOR THE CONVENIENCE AND GUIDANCE of just such men, we have carefully assembled the complete, certified, tool kits itemized and described on the next pages.

• YEARS OF EXPERIENCE AND ALL OUR TOOL "KNOW-HOW" are incorporated in each of these kits. They are chuck-full of our famous "TROWEL-BRAND" tools and have no dead weight or unnecessary items in them.

• CONFIDENT OF YOUR SATISFACTION AND WITH GREAT PRIDE we recommend each of these kits which are inspected, packed, and available for immediate shipment.

• AS THIS 1948 EDITION OF OUR CATALOG GOES TO PRESS, we have already delivered thousands of these and similar kits to the Veterans Administration all over the country. From Maine to California and from Canada to the Gulf. V. A. training officers have come to us for masonry tools.

• WHEN WE FIRST DESIGNED and assembled these kits late last year, the Veterans Administration was restricted in their purchases to \$50.00 tool kits. Regulations have since been changed so that we can now offer more complete kits selling up to \$100.00.

• THOSE OF YOU WHO PLAN to enter apprenticeship training under Public Laws 16 or 346 (G. I. Bill of Rights) will be interested to know that your local training officer need not be bound by these suggested kits. He can compile a list of the tools you need and want, then submit that list to us for quotation and delivery.
